Genes that fit *your* farm.

## NEW Perry E3

2725 HU (RM 0.6)

- ✓ Matures one day earlier than Altitude R2
- ✓ Solid performance across soil types with best performance in loam type soils

Intermediate Canopy  
Short - Medium Height

BACKGROUND		CHARACTERISTICS							
Line Number	Trait	Herbicide Tolerance(s)	Hilum Colour	Plant Height	Standability	Canopy Type	Flower Colour	Pubescence	Pod Colour
SC22-2725E3	Enlist E3™	Glyphosate 2,4-D choline Glufosinate	Light Brown	Short - Medium	8	Intermediate	Purple	Gray	Light Brown

MANAGEMENT		
Row Width (")	Soil Type	Emergence
7.5 – 30	All	7

DISEASE & PATHOGENS					
White Mold	SCN Resistance (Source)	Phytophthora Root Rot Field Tolerance	Phytophthora Root Rot Resistance Gene(s)	Sudden Death Syndrome	Brown Stem Rot
6	Yes (PI 88788)	Moderately Tolerant	Rps3a	8	6

Data values were collected under different management practices at different locations in different years, and are for comparison purposes only. Ratings on a scale of 1-9; 1=worst, 9=best.

**Enlist E3™ soybeans** contain the Enlist E3 trait that provides crop safety for use of labelled over-the-top applications of glyphosate, Glufosinate and 2,4-D herbicides featuring Colex-D® technology when applied according to label directions. Following burndown, the only 2,4-D containing herbicide products that may be used with Enlist™ crops are products that feature Colex-D technology and are expressly labelled for use on Enlist crops. 2,4-D products that do not contain Colex-D technology are not authorized for use in conjunction with Enlist E3 soybeans.

**WARNING:** Enlist E3 soybeans are tolerant of over-the top applications of glyphosate, glufosinate, and 2,4-D. Accidental application of incompatible herbicides to this variety could result in total crop loss. When using 2,4-D herbicides, grower agrees to only use 2,4-D products that contain Colex-D technology authorized for use in conjunction with Enlist E3 soybeans. Always read and follow herbicide label directions prior to use. Enlist 1™ and Enlist Duo™ are the only 2,4-D products authorized for use with Enlist crops. Consult Enlist herbicide labels for weed species controlled. Additional product-specific stewardship requirements for Enlist crops, including the Enlist™ Product Use Guide, can be found at [www.EnlistCanada.ca](http://www.EnlistCanada.ca). **Always read and follow label directions.** The transgenic soybean event in the Enlist E3™ soybean was jointly developed and owned by Corteva Agriscience and M.S. Technologies, L.L.C. ©™ Enlist, Enlist E3, the Enlist E3 logo, and Colex-D are trademarks of Dow AgroSciences LLC.
